# Mouvex<sup>®</sup> and Hydrocar Launch New MH6 Screw Compressor Website

*Website designed to highlight new solutions for dry bulk unloading*

**Auxerre, France & Modena, Italy – August 23, 2011** — Mouvex<sup>®</sup> and Hydrocar announced the launch of a new multilingual website dedicated to the MH6, the world's first combination screw compressor/power takeoff (PTO) unit for the dry bulk transport market. Located at [www.mhcompressor.com](http://www.mhcompressor.com), this new website is designed to highlight the many advantages of the MH6 Screw Compressor system. The MH6 is a result of a partnership between Mouvex and Hydrocar, and has been designed to be compatible with a truck's gearbox, while at the same time offering a 70% weight reduction when compared to existing equipment.

A key aspect of the site is the **Technology** section, which describes the unique design behind MH6 compressors. The combination of Hydrocar's innovative PTO device and the Mouvex screw compressor principles have provided a solution to dry bulk fleets that is lighter and less expensive than traditional equipment. Thanks to the lighter overall weight of the system, the MH6 is able to provide fleets with increased turnover per truck per year that equates to improved revenues.

Other key sections of the new MH6 website include:

- **Companies:** Gives you the background on Mouvex, Hydrocar and the benefits of their partnership
- **Products:** Details on MH6 Compressors, including downloadable Brochures, Spec Sheets and Operation Manuals
- **Examples:** Review customer case studies and videos of leading dry bulk fleets in Europe that have benefited from the MH6
- **Distributors:** Easy navigation allows users to find local MH6 Compressor distributors

The MH6 website is available in English, Italian, French, German and Spanish languages.

For more information on MH6 Screw Compressors, please visit [www.mhcompressor.com](http://www.mhcompressor.com).

*Mouvex<sup>®</sup> was incorporated in 1906 and is a leading manufacturer of positive displacement pumps and compressors for the transfer of liquids or dry bulk products worldwide. Through a global network of distributors and original equipment manufacturers, Mouvex serves the following markets: refined fuels, oilfield, energy, food /sanitary, military, transport and chemical process. Mouvex—headquartered in Auxerre, France—is a member of Dover Corporation's Pump Solutions Group (PSG<sup>™</sup>).*

*Hydrocar a member of Interpump Hydraulics SpA is headquartered in Nonantola (MO), Italy, with a very precise purpose: offer new power take-off mechanisms and devices to a variety of hydraulic systems for industrial vehicles. The hundreds of models created over the years and the many configurations applied to its components allow Hydrocar to confidently state that this objective has been positively fulfilled. The constantly increasing number of trucks around the world equipped with Hydrocar PTOs and pumps offers the greatest satisfaction for so many years of hard work and commitment.*
